Here is a simple PDF-ready content for CascadeType comparison table in English.

Hibernate CascadeType Comparison

Cascade Type	Description	Effect on Associated Entities
ALL	Applies all cascade operations	Includes PERSIST, MERGE, REMOVE, REFRESH, DETACH
PERSIST	Save operation	Saving parent entity also saves children
MERGE	Update operation	Updating parent entity also updates children
REMOVE	Delete operation	Deleting parent entity also deletes children
REFRESH	Reload operation	Refreshing parent entity also refreshes children
DETACH	Detach operation	Detaching parent entity also detaches children

Note: Using CascadeType.ALL applies all operations, so use with caution to avoid unintended deletes or updates.
